## NATURAL-BASED WATER TREATMENTS

### POND BACTERIA (WATER-SOLUBLE PACKETS)

Our proprietary All-Season powder pond bacteria formulation contains a blend of naturally occurring, beneficial pond bacteria, which naturally cleans ponds by eliminating murky water (organic suspended solids), bottom sludge (decaying grass clippings & leaves), problem nutrients (phosphate & nitrate), and odors. Our powder formulation has been packaged into pre-measured, water-soluble packets, to provide a quick & easy, mess-free way to apply our product. Each pail will treat a 1/4-acre farm pond for up to 60 days. This advanced "All-Season" formulation allows you to begin treating your pond earlier in the Spring, and allows you to keep treating it later into the Fall. It is also a 2-in-1 formulation, containing both pond bacteria and barley straw powder.

### POND BACTERIA (DISSOLVABLE TABLETS)

Our proprietary All-Season pond bacteria formulation contains a blend of beneficial pond bacteria that can perform in water temperatures as high as 110°F, and as low as 35°F. We have pressed our pond bacteria powder into pre-measured dissolvable tablets, which sink to the bottom of the pond, to help reduce bottom-sludge (muck). Just apply the dissolvable tablets directly into the pond water. This pond bacteria formulation will also naturally eliminate murky water, excess fish food, fish wastes, odors, problem nutrients (such as nitrate and phosphate) and toxins (such as ammonia and nitrite). This advanced "All-Season" formulation allows you to begin treating your pond earlier in the Spring, and allows you to keep treating it later into the Fall.

### POND BACTERIA POWDER

Our proprietary All-Season powder pond bacteria formulation contains a blend of naturally occurring, beneficial pond bacteria, which naturally cleans ponds by eliminating murky water (organic suspended solids), bottom sludge (decaying grass clippings & leaves), problem nutrients (phosphate & nitrate), and odors. Our premium pond clarifier, unlike industry standard pond clarifiers, is an "All-Season" pond treatment program, which allows you to begin treating your pond earlier in the Spring, and allows you to keep treating it later into the Fall. It is also a 2-in-1 powder formulation, containing both pond bacteria and barley straw powder.

### POND BACTERIA LIQUID

Our proprietary All-Season liquid pond bacteria formulation contains a blend of naturally occurring, beneficial pond bacteria, which naturally cleans ponds by eliminating murky water (organic suspended solids), bottom sludge (decaying grass clippings & leaves), problem nutrients (phosphate & nitrate), and odors. Each 1-gallon bottle will treat a 1/4-acre farm pond for up to 60 days. Our premium pond clarifier, unlike industry standard pond clarifiers, is an "All-Season" pond treatment program, which allows you to begin treating your pond earlier in the Spring, and allows you to keep treating it later into the Fall.

### CONCENTRATED BLUE POND DYE

This concentrated quart of blue farm pond colorant replaces industry standard gallons of dye. Our formula is 100% biodegradable and safe for use in farm ponds. Each concentrated quart will treat a 1-acre farm pond for up to 120 days. It will not stain birds, fish, plants, or wildlife when applied at the recommended rate. This product contains NO yellow dye, so it will not turn your pond water green, like industry standard pond dyes.

### CONCENTRATED BLACK POND DYE

This concentrated quart of black farm pond colorant replaces industry standard gallons of dye. Our formula is 100% biodegradable and safe for use in farm ponds. Each concentrated quart will treat a 1-acre farm pond for up to 120 days. It will not stain birds, fish, plants, or wildlife when applied at the recommended rate. This esthetically pleasing black colorant helps to achieve a "deep pond" look and provides better reflections off the surface of the pond.

# WATER GARDENS & KOI PONDS

## NATURAL-BASED WATER TREATMENTS

### POND BACTERIA (WATER-SOLUBLE PACKETS)

Our proprietary All-Season pond bacteria formulation contains a blend of beneficial pond bacteria that can perform in water temperatures as high as 110°F, and as low as 35°F. Our pond bacteria powder has been packaged into pre-measured water-soluble packets, for easy application. Apply packets directly to the pond water, at the rate of 1 packet per 1000 gallons. The water-soluble packets will begin to dissolve in the water, within minutes of application. This formulation will naturally eliminate murky water, bottom-sludge (muck), excess fish food, fish wastes, odors, problem nutrients (such as nitrate and phosphate) and toxins (such as ammonia and nitrite).

### POND BACTERIA (DISSOLVABLE TABLETS)

Our proprietary All-Season pond bacteria formulation contains a blend of beneficial pond bacteria that can perform in water temperatures as high as 110°F, and as low as 35°F. We have pressed our pond bacteria powder into pre-measured dissolvable tablets, for easy application. Apply pond bacteria tablets directly to the pond water, at the rate of 1 tablet per 300 gallons. This formulation will naturally eliminate murky water, bottom-sludge (muck), excess fish food, fish wastes, odors, problem nutrients (such as nitrate and phosphate) and toxins (such as ammonia and nitrite).

### LIQUID POND BACTERIA

Our proprietary All-Season pond bacteria formulation contains a blend of beneficial pond bacteria that can perform in water temperatures as high as 110°F, and as low as 35°F. This liquid formulation contains a high concentration of beneficial bacteria (200 billion CFU/gallon). It will naturally eliminate murky water, bottom-sludge (muck), excess fish food, fish wastes, odors, problem nutrients (such as nitrate and phosphate), and toxins (such as ammonia and nitrite).

### LIQUID BARLEY STRAW EXTRACT

Our liquid barley straw extract is a proprietary formulation, which contain extracted ingredients, derived from barley. It helps to naturally keep pond water clean and clear.

### LIQUID ALL-IN-ONE WATER CONDITIONER

This formulation is one of the most comprehensive in the industry. When applied at recommended rates, this complete formula removes Ammonia, Chlorine, Chloramines and Nitrite, as well as detoxifies Heavy Metals (including Copper), adds electrolytes, reduces stress and provides a synthetic skin slime coat to the water.

### LIQUID CONCENTRATED TAP WATER CONDITIONER

This formulation turns tap water into fish-safe water. It is one of the most concentrated water conditioners in the industry. When applied at recommended rates, this complete formula removes Chlorine, destroys Chloramines, and detoxifies Heavy Metals (including Copper).

### LIQUID FLOCCULANT

This formulation will bind together floating suspended particles and settles them to the bottom of Koi ponds and water gardens. It clears murky water caused by both "organic" particles (decaying plant material & fish wastes), as well as "inorganic" particles (mud & clay).

### LIQUID DEFOAMER

This formulation quickly eliminates unsightly foam in Koi ponds, water gardens and fountains.
